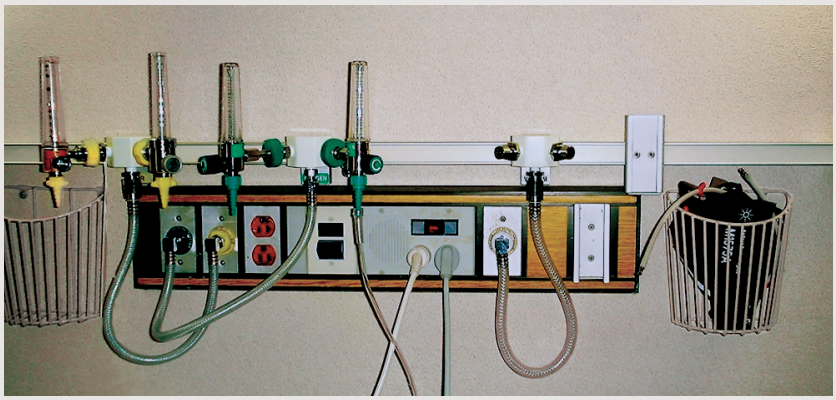
Rails & Accessories

Lifespan™
IMPROVING THE MEASURE OF LIFE



The bridge between the supply cart and the patient — the ideal tool to implement a process improvement program.

Using Rails and Accessories facility-wide for equipment management helps reduce and control inventory, simplifies swap out of technology and minimizes costs for maintenance and repair.

Gas Management

- Rail-based gas management solutions allow hospital rooms with inadequate gas supply to be brought up to code with minimal disruption and cost.

Convenient & Flexible

- Total freedom of equipment placement.
- Reduces inventory of bedside supplies.

Improves Process

- Rearrange instantly without tools.
- Store only those supplies needed at each bedside.
- Continuity of supply management throughout each department.
- Optimum work flow achieved by option to personalize work space.

Rails & Accessories

Lifespan™
IMPROVING THE MEASURE OF LIFE

Acuity Adaptable

- Universal use throughout the hospital ensures an acuity adaptable environment.
- Ease of installation with minimal interruption.
- Patient rooms can be reconfigured quickly to meet evolving needs.

Infection Control

- Eliminate patching and painting drywall by mounting infection control devices on the rail.
- Any brand of sharps, soap or sanitizer can be mounted on the Lifespan Rail.

The Lifespan Rail & Accessory system and its predecessor, The Fairfield® Rail System, have been installed in thousands of hospitals where the original equipment continues to meet customers needs since the 1970s.

Monitor Management

- Brackets, shelves, and articulated arms help users to place monitors where they can be seen and reached.

Infusion Management

- These accessories are fully rail-compatible and permit IV poles and IV hangers to be placed almost anywhere near a patient.

Supply Management

- Storage and presentation of diagnostic tools, disposables, gloves, supplies and other frequently used items is always a problem in crowded patient rooms.
- Our assortment of shelves, baskets and specialty containers keep the patient area organized and neat.

Printed with soy inks on paper containing 10% post-consumer waste.
