IDW Normalization Filter

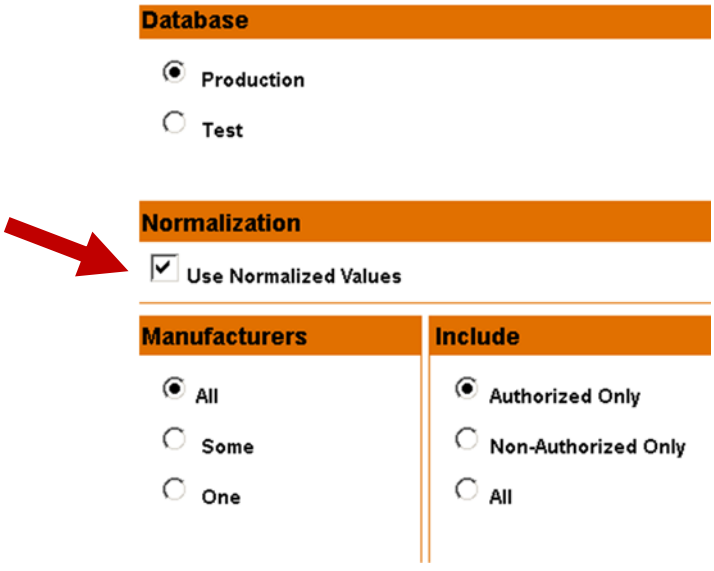
To set your IDW Normalization Filter to allow viewing and receiving normalized data in the IDW, you have two options:

Case-by-Case Basis: To create a temporary override to view and receive normalized values in data requests in a unique occurrence

- Select “Data Request” from “Basic” drop-down menu

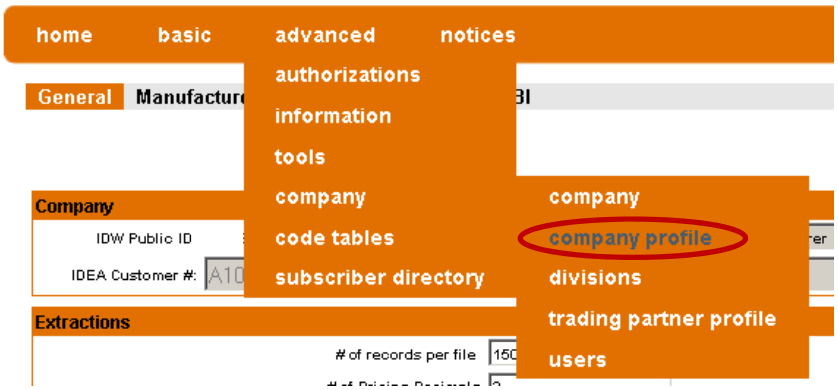
- Select “New”

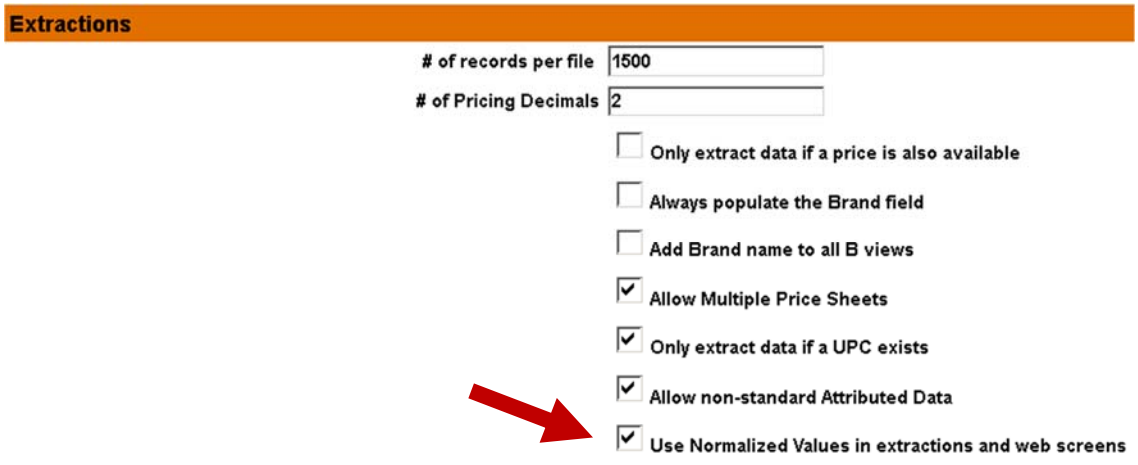
- Check “Use Normalized Values” within “Normalization” box



Permanent Company Profile: To create a permanent override to view and receive normalized values in all data requests

- Select “Company” from the “Advanced” drop-down menu, then select “Company Profile”





- Check “Use Normalized Values” within “Extraction” box
