

SPIDERTRAX UPPER SHOCK MOUNT KIT INSTRUCTIONS

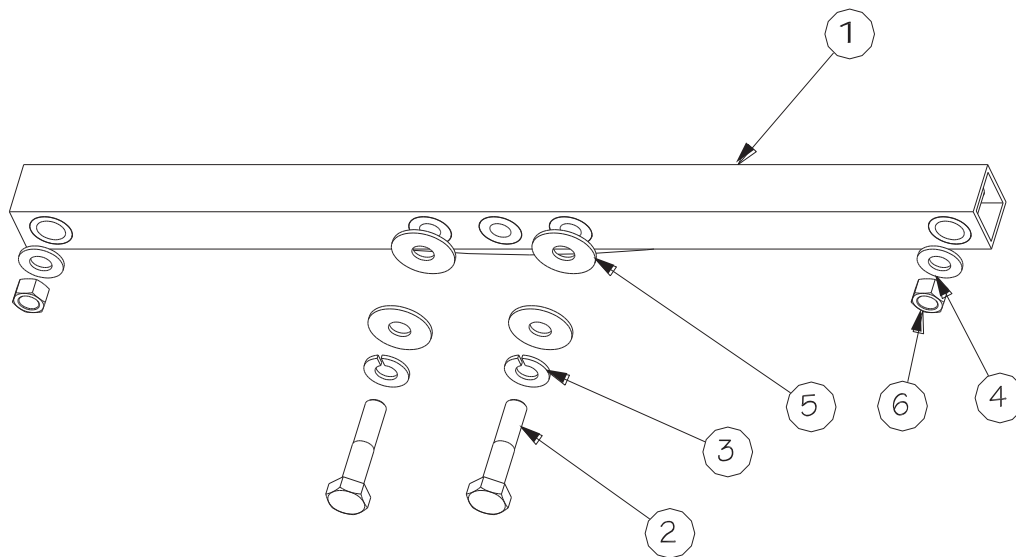

GENERAL DESCRIPTION

The Upper Shock Mount Kit (USM-001) is designed to allow the use of longer travel shocks in the rear of a Suzuki Samurai. It works by bolting onto the existing rear upper shock mounts. This kit comes complete with the upper shock mount and all hardware for the install.

To install the Upper Shock Mount Kit, follow these steps:

- 1) Remove shocks from vehicle as per OEM Suzuki Service Manual procedures.
- 2) Install upper shock mount to existing shock mount as shown in figure below.
- 3) Re-install upper portion of shocks using two threaded bushings in upper shock mount. Refer to figure below for hardware assembly. The center bushing in upper shock mount is designed to accommodate a limiting strap if needed.
