Certification Prep

SUITECLOUD DEVELOPER EXAM PREPARATION | **UPDATED FOR SUITESCRIPT 2.0**

Are you ready to become a NetSuite Certified SuiteCloud Developer?

Do you want your knowledge validated and recognized?

Participate in this "Ask-The-Experts" study session, and then take the SuiteCloud Developer Exam! The exam is an updated version where SuiteScript 1.0 questions are replaced with SuiteScript 2.0 questions.

EXAM VOUCHER

A voucher for the NetSuite SuiteCloud Developer Exam (upgraded to SuiteScript 2.0) is included with your registration. You can use the voucher to take the exam during the SuiteWorld conference or later at your convenience. If you pass the exam while at SuiteWorld, you will be able to promote your certification status during the conference!

In the **NETSUITE CERTIFICATION: SUITECLOUD DEVELOPER EXAM PREPARATION** course, you will brush up on your NetSuite developer knowledge by participating in an interactive group study session. Guided by a NetSuite expert, you examine key subject areas and use cases while reviewing NetSuite features and capabilities.

Study materials cover information related to the test objectives within the seven subject areas of the exam. You are provided a NetSuite demo account containing numerous SuiteScripts (all using SuiteScript 2.0) and workflows (SuiteFlow), along with SuiteTalk code examples in Java and C#.

Lectures, hands-on exercises and best practices discussions will focus on subject areas specific to an updated version of the developer exam available at SuiteWorld, the main differentiation with the current exam objectives being use of SuiteScript 2.0 instead of SuiteScript 1.0:

- SuiteScript 2.0
- SuiteFlow
- SuiteTalk
- SuiteBundler
- SuiteAnalytics
- Design Fundamentals

Additional topics covered during the study session will be driven by the participants' needs and questions. By the end of this course, you will be able to evaluate your readiness to take the SuiteCloud Developer Exam and identify where further study might be needed.

Note: Participants should have the SuiteCloud IDE (or preferred development environment) pre-installed on the computer they will be using in class.
