# MACLEOD FIELD COVER SYSTEM

COVERMASTER® is proud to offer the ultimate semi-automated field protection system, the MacLeod Cover. This is a revolutionary product that is a proven field management tool, used to protect against the extremes of winter, be it rain, snow or extreme cold.

The MacLeod Cover System provides revolutionary pre-event management, to ensure your field is game ready no matter the weather conditions prior to the game. Once installed, the cover provides a complete dome over top of your playing surface, to maintain the most optimal environment for the field. The cover is made of a unique material that is translucent, waterproof and lightweight, which allows for natural photosynthesis and airflow for your natural grass. It is semi-automated allowing for easy handling and fast installation and allows for maintenance and repair work to continue below the cover. The MacLeod Cover has a tolerance down to very cold temperatures and in recent winters the MacLeod System has succeeded in managing extreme weather conditions at many of the biggest winter sporting events, including International Rugby, Wembley Cup Finals, etc.

## **The MacLeod Field Management System:**

- The answer to extreme cold, snow and rain
- Total protection in the most difficult conditions
- Natural photosynthesis and airflow
- Maintenance and repair work below the cover
- Semi-automated handling system
- Eliminates or reduces under soil heating need or running costs
- 5 key elements - tube, sheets, fan unit, anchors, reel system

**18ft of Clearance at the Center**  
-Work underneath the inflated cover

**Fully Inflated Cover**

**Easy Snow Removal**

## Testimonials

### **Ipswich Town FC**

"I can confirm that everyone at the club was delighted with the cover during last season. At least 4 major matches would have been lost to the weather had we not had the cover and two of the were live on TV. In all, the cover was used 15 times for weather and 4 times as a maintenance tool."

### **Lier FC, Belgium**

"The system has already avoided cancellation of 2 matches in the Jupiler ProLeague, which we would definitely had lost without the covering system."

### **The FA, Governance Department**

"Since 2001, the system has succeeded in significantly reducing the risk of postponements of live televised games in the world's most famous cup competition. The system has protected participating clubs significant TV revenues and match day revenue streams and ensures that worldwide broadcast coverage is not compromised by a cancellation."
