STEP 3
Connect DC lead from DC Adapter to Remote Receiver

STEP 4
Assembly completed Ready for use

Use and Care of H-D® Oil Illuminated Message Board

- 1). Place the illuminated message board on a soft, flat surface. Wipe the writing surface with a clean, soft, damp cloth. Create your message using only a water based fluorescent marker. One is provided in the package.
- 2). Connect the board with the USB assembly as illustrated.
- 3). Attached the USB assembly to the DC power adapter, and plug into your power source.
- 4). The illuminated message board may be hung on the wall using secured screws or placed on an easel for display.

Operation of Remote

On and Off buttons refer to the message area of the board. Once plugged in the graphic remains illuminated. The message will illuminate colors as related to the colored buttons. (For example the red button will illuminate your message red.)

- Flow button alternates the color of the message. 1 second
- Auto button alternates the message color every 6 seconds
- Flash button creates a strobe light effect and fluctuates the color
- Special button creates a random blink with alternating color
- Stop/Open button stops the current effect, press the Stop/Open button to resume
- The - and + buttons control brightness
- Flash + and Flash - alters the flashing speed
- Up and Down switches message color

Cleaning

Wipe the writing surface with the micro fiber cleaning cloth provided.

Warranty

Free replacement of any part that fails within 90 days from date of purchase, excluding shipping costs. Void if damaged by misuse, accidents, alterations, failure to follow instructions, fire, flood, and acts of God.
