Setting Up and Configuring

[NetSuite Essentials](#)

NetSuite Essentials is the first course you should take to better ensure your implementation success. This course provides the critical information implementation teams need to make intelligent decisions before Go Live and provides a flexible learning environment. Through a series of hands-on exercises, you practice key tasks associated with setting up and enabling preferences for CRM and ERP in NetSuite.

View the [Course Data Sheet](#)

[NetSuite OpenAir Essentials](#)

Through the NetSuite OpenAir Essentials course, you practice configuring, customizing and maintaining a NetSuite OpenAir account based on specific business requirements. You begin by examining key features and functionality while learning the critical skills needed to set up, plan, and execute projects in OpenAir. By completing a series of hands-on exercises, you learn how to take full advantage of this comprehensive solution to drive on-time and on-budget delivery of your projects!

View the [Course Data Sheet](#)

[NetSuite Audit & Control \(GRC\)](#)

In this course you will explore key concepts and features for setting and monitoring access management, change management, and financial controls within NetSuite. Through a series of instructor-led lectures and self-paced topics, you will learn how to set controls and gather audit information in NetSuite.

View the [Course Data Sheet](#)

Managing and Maintaining

[NetSuite: Administrator Fundamentals](#)

This course is a must for any newly-hired or self-taught NetSuite Administrators! Administrator Fundamentals examines key administrator tasks and responsibilities to provide the foundational knowledge needed to tailor, maintain, and optimize NetSuite for your users' business needs. Through a series real-life scenarios and hands-on exercises, you learn how to manage a NetSuite account like a pro.

View the [Course Data Sheet](#)

Accounting and Finance

[NetSuite: Financial Management](#)

Do you want to learn how to use NetSuite's comprehensive financial management capabilities to go beyond traditional accounting? In the NetSuite: Financial Management you learn how to use NetSuite's ERP features and capabilities to control expenses, accelerate your financial close and ensure complete real-time visibility into the financial performance of your business.

View the [Course Data Sheet](#)

[Using Accounts Payable \(AP\)](#)

Using Accounts Payable includes 26 video tutorials of about 10 minutes each. Each tutorial illustrates how to complete a specific AP task in NetSuite. You can select which tutorials to watch for just-in-time training or you can complete all of the tutorials for a comprehensive training experience. Expert NetSuite instructors walk you through each AP process step-by-step. Along the way, recommended tips, best practices, and key points are shared to make sure you use NetSuite most effectively.

View the [Course Data Sheet](#)

[Using Accounts Receivable \(AR\)](#)

Using Accounts Receivable includes 23 video tutorials, each about 10 minutes in length. Each tutorial illustrates how to complete a specific AR task in NetSuite. You can select which tutorials to watch for just-in-time training or you can complete all of the tutorials for a comprehensive training experience. Expert NetSuite instructors walk you through each AR process step-by-step. Along the way, recommended tips, best practices, and key points are shared to make sure you use NetSuite most effectively.

View the [Course Data Sheet](#)

Managing Items and Inventory

[Inventory and Item Costing](#)

Inventory Item Costing introduces you to the essential concepts of NetSuite inventory items and item costing methods, and then teaches you the critical skills needed to track the total value of your assets, so you can calculate your profits more accurately. By the end of this course, you will know how the NetSuite costing engine works with various costing methods and inventory item types.

View the [Course Data Sheet](#)

Marketing and Sales Automation

[Sales Force Automation: Fundamentals](#)

Sales Force Automation: Fundamentals introduces you to the essential concepts of NetSuite SFA features and capabilities and teaches you the critical skills needed to setup, plan, and execute sales operations in NetSuite. This two-day course begins with a “big picture” overview and demonstrations of core functionality and capabilities to introduce you to NetSuite SFA and Customer Relationship Management (CRM).

View the [Course Data Sheet](#)

[Marketing Automation Workshop](#)

Making the most of marketing automation requires using the right tools to successfully attract and keep customers. In the Marketing Automation Workshop, you work to set up Marketing Automation features and preferences, creating and managing a multi-channel campaign, and design email templates. You will learn to create online lead generating forms; import leads; identify opportunities with Upsell Manager; use workflows to support lead nurturing; and more.

Analyzing Data and Running Reports

NetSuite OpenAir Reporting

NetSuite OpenAir Reporting is geared towards administrators, managers and super-users, who are new or experienced OpenAir users. Through a series of instructor-led and self-paced topics, this course introduces reporting modules and builds upon the methods for creating and managing robust reports in OpenAir accounts.

View the [Course Data Sheet](#) and [Schedule](#)

SuiteAnalytics: Reports and Searches

SuiteAnalytics: Reports and Searches will help you turn your data into knowledge and your knowledge into business strategies that take you where you want to go. Learn how to obtain actionable analysis, enforce business processes, and get real-time views into your company data across sales, marketing, service and fulfillment. (Finance and accounting users who need to create and customize financial reports should take the “SuiteAnalytics: Financial Reports and Searches” course.)

View the [Course Data Sheet](#) and [Schedule](#)

SuiteAnalytics: Financial Reports and Searches

SuiteAnalytics: Financial Reports and Searches will help you use NetSuite’s real-time reports, saved searches and key performance indicators (KPIs) to get the critical information you need. Learn the tools to unlock your NetSuite data so you can continually monitor the performance of your business. This course is key for NetSuite users who have an accounting or finance job role and want to learn how to create reports, financial statements, saved searches, and KPIs more effectively.

View the [Course Data Sheet](#)

SuiteAnalytics: Advanced Searches

Do you want to take your saved search skills to the next level? SuiteAnalytics: Advanced Searches shows you how to dig deep into your NetSuite data by applying advanced Saved Search functionality to calculate and transform your search results. Acquire the set of skills you need to create complex saved searches that effectively mine your NetSuite data for better business intelligence.

View the [Course Data Sheet](#)

Managing Commerce

Site Builder: Fundamentals

Site Builder Fundamentals is a two-day course that introduces the essential concepts of NetSuite Site Builder while teaching you how to track and monitor inventory and use a range of merchandising options to drive sales.

View the [Course Data Sheet](#)

SuiteCommerce Advanced: Fundamentals

In this three-day SuiteCommerce Advanced: Fundamentals course, you will learn how to effectively set up, configure and manage a SuiteCommerce Advanced (SCA) web store by first examining how your back-end ERP feature configuration impacts the user experience of your SCA web store. You will then learn about the benefits of an omnichannel commerce solution and how SCA leverages NetSuite's single, unified platform to provide a seamless, integrated online purchasing experience.

View the [Course Data Sheet](#)

SuiteCommerce Advanced for Developers

Learn how to create unique and highly customized ecommerce web stores with NetSuite's SuiteCommerce Advanced (SCA) platform.

View the [Course Data Sheet](#)

SuiteCommerce InStore: Fundamentals

This 3-day course teaches the knowledge and skills necessary to effectively setup, configure and manage a SuiteCommerce InStore (SCIS) site. Through hands-on exercises, you will learn how to configure back-end ERP processes, SCIS custom records and related SCIS site preferences to support typical in-store, point-of-sale use cases.

View the [Course Data Sheet](#)

Industry Specific

ERP: Fundamentals

ERP: Fundamentals examines key administrator tasks and responsibilities to provide the foundational knowledge needed to tailor, maintain and optimize NetSuite for your business. The course begins with a high-level introduction of NetSuite capabilities before turning to the daily setup, configuration, and customization tasks performed by administrators and business process owners.

View the [Course Data Sheet](#)

Wholesale/Distribution: Fundamentals

This 3-day course introduces the essential concepts of NetSuite's Wholesale Distribution (WD) solution while teaching the critical skills needed to set up, plan, and execute business process operations in NetSuite.

View the [Course Data Sheet](#)

Software: Fundamentals

Software: Fundamentals examines key administrator tasks and responsibilities to provide the foundational knowledge needed to tailor, maintain and optimize NetSuite for your business. The course begins with a high-level introduction of NetSuite capabilities before turning to the daily setup, configuration, and customization tasks performed by administrators and business process owners.

View the [Course Data Sheet](#)

Retail: Fundamentals

Retail: Fundamentals examines key administrator tasks and responsibilities to provide the foundational knowledge needed to tailor, maintain and optimize NetSuite for your business. The course begins with a high-level introduction of NetSuite capabilities before turning to the daily setup, configuration, and customization tasks performed by administrators and business process owners.

View the [Course Data Sheet](#)

Nonprofit: Fundamentals

Nonprofit: Fundamentals provides the foundational knowledge needed to tailor, maintain and optimize NetSuite for your organization by examining key administrator tasks and responsibilities. The course begins with a high-level introduction of NetSuite capabilities before turning to the setup, configuration and daily processing tasks performed by administrators and business process owners.

View the [Course Data Sheet](#)

SuitePeople: Fundamentals

This course introduces the essential concepts of the NetSuite SuitePeople solution. You will explore how to configure NetSuite SuitePeople and use the solution for Human Capital Management.

View the [Course Data Sheet](#)

SuiteBilling: Fundamentals

This course introduces the essential concepts of the NetSuite SuiteBilling feature. You will explore how to configure NetSuite SuiteBilling and use the feature for subscription services and recurring billing.

View the [Course Data Sheet](#)

WMS Lite: Fundamentals

This course introduces the essential concepts of the NetSuite WMS Lite solution. You will explore how to configure NetSuite WMS Lite and use the solution with a RF mobile handheld scanner.

Through system walkthroughs and downloadable quick reference guides, you will learn to replace manual warehouse processes with automation and get real-time access into transactions and inventory movement.

View the [Course Data Sheet](#)

Manufacturing: Configuring NetSuite for Your Business

Manufacturing: Configuring NetSuite for Your Business introduces you to essential NetSuite Manufacturing features and capabilities while teaching you the critical skills needed to set up, plan and execute manufacturing operations in NetSuite. Through a series of real-life scenarios and hands-on exercises, you examine core tasks and best practices for setting up inventory items, costing, routing, and BOM structures; creating purchase orders, assemblies, and routings; managing work orders through WIP; and more.

View the [Course Data Sheet](#)

[SRP: Configuring NetSuite for Your Business](#)

SRP: Configuring NetSuite for Your Business introduces you to the essential concepts of NetSuite Services Resource Planning (SRP), while teaching you the critical skills needed to set up, plan, and execute projects in NetSuite. Through a series of real-life scenarios and hands-on exercises, you examine core tasks and best practices for planning and collaborating on projects, reducing dependence on resource management spreadsheets, techniques for ensuring projects are completed on time and within budget, and more!

View the [Course Data Sheet](#)

Automating Business Processes and Customizing

[SuiteCloud: Exploring the NetSuite Platform](#)

Are you a new administrator or developer who needs to add customizations to an existing NetSuite account? SuiteCloud: Exploring the NetSuite Platform provides an overview of the NetSuite architecture and all of the SuiteCloud platform tools. By the end of this course, you will have fundamental knowledge of the SuiteCloud platform tools so you can determine how you can satisfy your business requirements for customizing NetSuite applications, building completely new applications, or integrating other applications with NetSuite.

View the [Course Data Sheet](#)

[SuiteFlow: Workflow Fundamentals](#)

With SuiteFlow you can automate custom approval routing, apply validations, send email, create related records, direct the end user to appropriate forms in the user interface, and more. In SuiteFlow: Workflow Fundamentals, you explore key foundational features of SuiteFlow while learning best practices for designing and constructing workflows that automate your business processes.

View the [Course Data Sheet](#)

[SuiteFlow: Workflows for Developers](#)

Have you seen an increase in the change frequency and complexity of your workflows as your business grows? Do you need to support more complex workflows to meet the changing needs of your business? Then take your SuiteFlow development skills to the next level!

View the [Course Data Sheet](#)

[SuiteScript 2.0: Custom User Interface Development](#)

This 2-day course teaches experienced SuiteScript 2.0 developers how to create custom UIs with Suitelet, User Event, and Portlet scripts. Learn to build the UI you want, to meet your unique business requirements. Use SuiteScript 2.0 to embed UI objects, custom HTML, and third-party JavaScript libraries into custom UIs, while incorporating best practices to protect your customizations during each NetSuite release.

View the [Course Data Sheet](#)

[SuiteScript 2.0: Extend NetSuite with JavaScript](#)

During this 5-day course, you will learn how to use SuiteScript, a JavaScript-based API, to create flexible business logic. Through best practice discussions and real-life use cases, you will gain hands-on experience building an array of scripts. You will also learn how to use NetSuite's Script Debugger to quickly diagnose and correct problems within your scripts. By the end of this training, you will be able to take full advantage of the SuiteScript 2.0 syntax to create custom functionality, increase user productivity, and improve the performance of your NetSuite application.

View the [Course Data Sheet](#)

[SuiteScript 2.0 for Experienced SuiteScript Developers](#)

This 2-day delta course teaches experienced SuiteScript 1.0 developers how to apply their existing knowledge of User Event, Client, Suitelet, and other script types, so they can write those scripts in the new SuiteScript 2.0 syntax. Along the way, they will also gain experience with new script types such as Map/Reduce, new APIs like the Promise API, as well as creating their own custom modules.

View the [Course Data Sheet](#)

[SuiteScript 1.0: Extend NetSuite with JavaScript](#)

SuiteScript 1.0: Extend NetSuite with JavaScript provides developers the tools know-how and best practices to create and deploy many script types designed to satisfy a variety of business criteria. Students gain hands-on experience building an array of scripts to customize the functionality of NetSuite applications and then use troubleshooting tools to quickly diagnose and correct problems.

View the [Course Data Sheet](#)

Integrating Applications

[SuiteTalk: Integrate Your Applications](#)

This 5-day course provides integration specialists and developers the knowledge to execute web service operations against NetSuite data. Students work with the NetSuite WSDL, analyze SOAP messages, and execute web service operations using either Java or C#. Students using other object-oriented languages are welcome to attend this course as the web services API is identical.

View the [Course Data Sheet](#)

Certification Preparation

[NetSuite Certification: SuiteFoundation Exam Preparation](#)

Are you ready to earn your SuiteFoundation certification? Guided by a NetSuite expert, you examine frequently missed subject areas from the SuiteFoundation exam, while reviewing NetSuite features and capabilities. You begin by studying key setup tasks; reviewing standard process flows; and exploring web store functionality while building an intranet in a demo account. You will also compare audit and search functions, as well as data manipulation options. By the end of this course, you should be able to evaluate your readiness to take the SuiteFoundation exam and identify where further study might be needed.

View the [Course Data Sheet](#)

[NetSuite Certification: ERP Consultant Study Session](#)

Do you want your experience validated and recognized? Are you ready to become a certified NetSuite ERP Consultant? The NetSuite Certification: ERP Consultant Study Session focuses on ERP capabilities such as accounting and financial management, platform capabilities such as reporting, searching, and customization and process automation. For more information about required skill levels, recommended courses, and the certification exams, visit the [NetSuite Certification Program](#) page.

View the [Course Data Sheet](#)

[NetSuite Certification: Administrator Exam Preparation](#)

Are you ready to become a certified NetSuite Administrator? Do you want your experience validated and recognized? The NetSuite Certification: Administrator Exam Preparation course helps you prepare and validate your knowledge before taking the NetSuite Administrator Certification Exam. You begin by studying key setup tasks; examining users, roles and permissions; and performing common application Customizations. The second part of the course focuses on platform capabilities such as reporting, searching, and process automation. For more information about required skill levels, recommended courses, and the certification exams, visit the [NetSuite Certification Program](#) page.

View the [Course Data Sheet](#)

[NetSuite Certification: SuiteCloud Developer Exam Preparation](#)

Are you ready to become a NetSuite Certified SuiteCloud Developer? Do you want to contribute even more to your organization's success? The NetSuite Certified SuiteCloud Developer Exam Preparation course helps you brush up on your NetSuite knowledge by reviewing key subject areas and use cases about NetSuite features and capabilities. For more information about required skill levels, recommended courses, and the certification exams, visit the [NetSuite Certification Program](#) page.
