ENHANCE INSTRUCTOR PRODUCTIVITY AND SIMPLIFY COURSE MANAGEMENT

Labyrinth eLab web-based assessment and learning management tool is a secure, easy-to-use solution that offers automated skills assessment, gradebook management and extended online training.

- **Higher productivity.** With fewer hours spent grading exams, instructors can effectively manage larger classes and spend more time with students. A comprehensive gradebook simplifies the management of homework and tests, and search and retrieve functions eliminate the manual task of searching through stacks of papers to find a specific homework assignment.

- **Greater control**. Management of assignments and tests becomes simple with eLab's learning management system. Assignments can be submitted directly through eLab, eliminating the administrative challenge of managing dozens or even hundreds of printed or emailed assignments. Reporting features track individual and class performance, empowering students to monitor and manage their own performance, and enabling instructors to focus efforts on areas needing additional support. And instructors can view each and every step taken by students, enabling the verification of work and demonstration of the correct steps.

- **Quick proficiency**. eLab's intuitive interface enables instructors and students to quickly learn and master the software. Little to no training is necessary; even students with no prior computer experience become efficient and effective users almost immediately.

Features & Benefits

Automated Assessment. eLab automates the process of grading student exams. Students receive instant feedback; no more waiting for time-stretched instructors to complete grading.

Gradebook Management. eLab's online gradebook makes managing assignments, quizzes, and tests a breeze. Assignments are submitted directly through eLab; instructors no longer need to manage paper or email submissions.

Supplemental Learning Tools. eLab provides students with additional training resources that complement Labyrinth materials. Video tutorials provide step-by-step instruction. Multiple path simulation allows students to use virtually any path to answer questions (selected courses).

Seamless integration with Labyrinth materials. eLab closely follows the design of existing Labyrinth books and materials, making it easy for students to follow and easy for instructors to integrate into curriculum.

Fully configured courses. Many texts are available with a complete *Course-in-a-Box* eLab option, with fully configured and populated lessons and assignments. Instructors can get started with almost no set up.

Visually appealing and intuitive interface. Exceptionally easy to use, users become proficient with little to no training

Reliable, web-based platform. eLab is completely online and web-hosted by Labyrinth. No software installation on computers or servers is required. Labyrinth provides unlimited phone and email support for both instructors and students.

Superior value. Instructors and students can realize all the benefits for a price as low as $7.50 per student. With no software to purchase, maintain or upgrade, no investment in extensive training and free technical support, eLab offers an exceptional value.

Technical Specifications

The following elements are required for a complete eLab experience:

- Web browser (Internet Explorer 5.0 or higher, Mozilla FireFox 2.0 or higher, America Online 7.0 or higher, Apple Safari 1.0 or higher, or Netscape Communicator 6.0 or higher) with Internet access
- Adobe Flash Player
- Adobe Acrobat Reader
- Windows Media Player

Getting Started

Educators register for eLab at **www.labyrinthelab.com**. After approval by Labyrinth, educators have unlimited access to all educator functions, including all eLab courses and learning management system functionality.

Students registered in eLab courses access eLab using a student license key. Student keys remain active for up to two years following the initial activation date. Students can purchase unlimited course keys individually, or single course keys bundled with textbooks. Institutions can purchase single course keys bundled with textbooks or blocks of single course keys.

Single course license keys allow one student to register for one eLab course.
Unlimited course license keys allow a single student to use the license for an unlimited number of courses for up to two years. Unlimited course licenses are sold independently of books.
Institutional license keys are available to institutions in sets ranging from 5 to 1000 licenses for as low as $7.50 per student. Each individual usage allows one student to register for one eLab course.
