

BRAID INSTRUCTIONS

1. Hold the nine threads in a bundle so the threads are even. Tape the top of the bundle to a table or hard surface. Tie one of the ten-inch threads around the bundle, just under the tape, and trim the excess with scissors. Divide the bundle into three parts of three strings each. Place the part on the left over the middle part.

2. Place the part on the right over the new middle part.

3-4. Repeat, alternating the right and left bundles.

5. Tie a second single thread to the end of the braid, and trim the excess from the knot.
