

Production Personnel

Microbiologics, a leading global manufacturer of biological controls and standards, is currently seeking a candidate to join our Production Team! As a member of Microbiologics Production Team, you will be responsible for the manufacturing of microorganism product lines. Effective verbal and written communication skills, ability to use sound judgment, organization and strong people skills are a must for success in this role.

Essential Responsibilities:

- Manufacture microorganisms as assigned by the Production Supervisor or Production Lead.
- Operate the lyophilizers.
- Perform maintenance according to the General Maintenance Schedules when applicable.
- Inform the Production Supervisor or Production Lead on the status of production, effectiveness of the quality management system and assessing opportunities for improvement, the need for changes and to ensure customer satisfaction
- Perform and document that specified production, labeling and storage functions and activities are recorded on each DHR and comply with the provisions contained within the DMR.

Physical Requirements and Environmental Attributes:

- Occasionally lift and move up to 25 pounds to shoulder height and 50 pounds to waist height unaccompanied.
- Regularly stand/walk or sit for duration of shift.
- Occasionally required to stoop, climb, or balance.
- Coordinated use of hands and fingers to grasp, feel objects, transfer small items from one hand to another, fine manipulation, and bilateral reach with arms.
- Use of close vision, depth perception and ability to adjust focus.

Desired Education/Experience:

- High School education or equivalent
- No previous experience required, on the job training provided.

If you are interested in joining our Production Team please send your resume to hr@microbiologics.com.
